+ Reduced memory usage with more then 80%

Bug Fixes

* RMonitor sends race position instead of qualify position in race mode
* Export problem HTML for starting grid is fixed
* Starting grid printouts fixed
* Organization name overlaps time if too long
* Manual passing or photocells not assigned if passings file was deleted
* Short number is in the switch transponder popup menu
* Registration number not completely readable in the about dialog if too long
* Fixed intermittent connection problems to decoder
* Fixed leader calculation (no leader for lap 0)
* Fixed position correction penalty
* Fixed drag and drop competitor support in the processing page
* Fixed total time penalty correction error in case a competitor only has a manual finish passing
* Fixed lost qualification requirements when runs are copied to another group
* Selection option when driver report is printed is disabled

Discontinued plug-in support

* MyLaps Handheld plug-in no longer supported in SP2
* Multiple Active Runs (MAR) plug-in no longer supported in SP2
